<sup>3</sup> Listing of Fruit and Vegetable Processing Plants,  
Continental United States,  
1943 //

Prepared by

Fruit and Vegetable Branch (

Food Distribution Administration,

10000  
10000

Type of Plant:

C - Canning  
F - Freezing  
D - Dehydration  
P - Preserves  
B - Brine and Chemical Preservation  
N - Nuts and Nut Products  
V - Vinegar and Cider  
S - Specialties  
O - Other commodities than fruits and vegetables

Combinations of letters indicate combination plant type.

Suitability for Continuous Inspection:

"Yes" or "no" means that the inspector visiting the plant gave a definite opinion as to the plant's suitability for continuous inspection.

"Apparently yes" means that the inspector gave no definite opinion, but reported the plant as meeting the four following conditions:

1. Buildings in good condition.
2. Sufficient supply of clear water.
3. Sufficient sewage disposal system.
4. Plant clean and/or well managed.

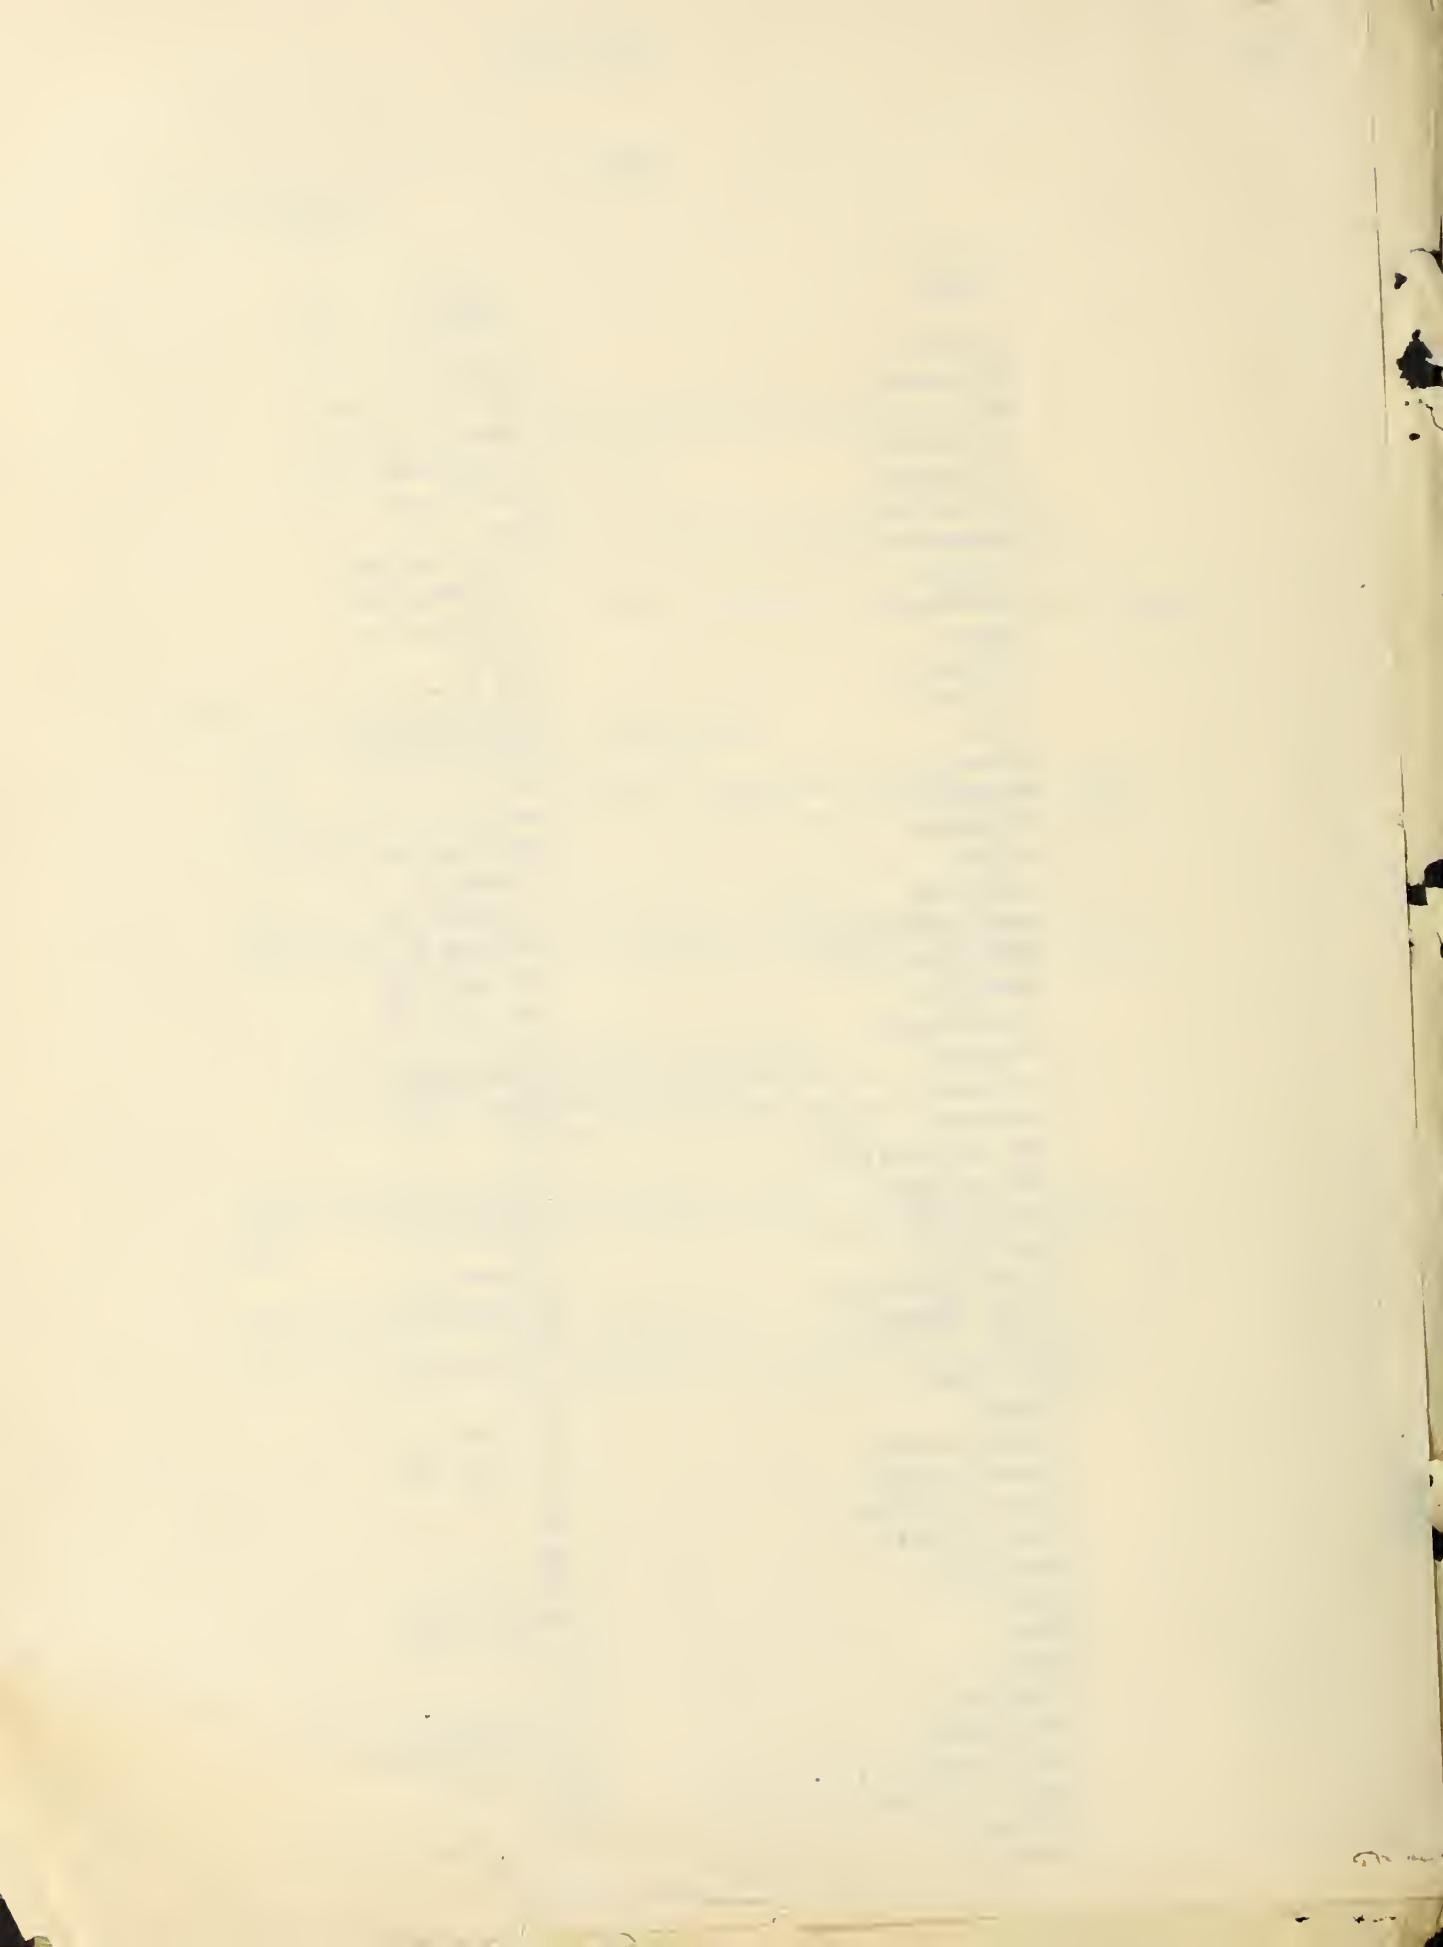

"Apparently no" means that one or more of the four conditions was reported or implied by the inspector as not being met.

"O" designation implies neither an affirmative or negative classification - used mostly for prune and apple driers.

745145

## INDEX

STATES	PAGE
Alabama	89
Arkansas	91 thru 95
Arizona	108
California	118 thru 130
Colorado	106
